Subject: Public comment-wi-fi in schools
Date: Wednesday, February 19, 2014 1:02:08 PM

Dear DOH/OSPI:

My name is Miranda Taylor, I live at Personal Information - Privacy - RC... Seattle, WA 98126. email:

Personal Information - Privacy - RCW 42.5...

Personal Information - Privacy...

Your conclusion that "Wi-Fi is unlikely to pose a health risk" is based upon a suppression of evidence, (Omission of the 2013 French Update, 2013 British Columbia Centre for Disease Control report and the 2009 President's Cancer Panel report). Your conclusion is also based upon a dilution of the evidence with biased and obsolete reports. Your conclusion is in direct opposition to the most recent findings of international health organizations, (The World Health Organization; 2013 French Update, 2013 British Columbia Centre for Disease Control report and the 2009 President's Cancer Panel report).

Your faulty conclusions may result in poorer outcomes for many children from our state schools, as health is primary to learning. I work in the health care field. My experience and my patients' experience with constant Wi-Fi exposure is that it interferes with the health of their nervous systems. It entirely affects and diminishes their health, even the ones who are not yet sensitive are affected in the long-term.

Sincerely,
Miranda Taylor
